

WH-5C Check valve pump

New NeocerAM WH-5 pumps, check valve version. These pumps are ideal for products with low and medium viscosity. Their modular design make these pumps easy to integrate with automated filling equipment.

- Volume up to 2 L
- Filling accuracy of up to $\pm 1/2$ % or better
- Pumps actuated pneumatically or by servo motor.
- Adjustment of filling volume and speed control by a precise built-in micrometer, for pneumatic pump drive type.
- High flow check valve technology for low viscous products up to 15,000 cps., without any solid particles. Consult us for higher viscosity applications.
- Applications: Cosmetics, food, pharmaceutical, home care and more
- Reed switch ready design for accurate position feedback
